

Appendix B

Statement of purpose (for revision)

I want to apply for a university in USA. I am interested in science. It fascinated me in high school chemistry contest in Beijing. I was number 2 in contest. So, I study chemistry at your university. At my university, I study Chemistry, Principles of Chemical Engineering and had Lab too.

When I go to your university, I want to learn more knowledge in Chemical Engineering. It motivates me to study graduate program and explore advanced research. I think I can study there because I studied chemistry undergraduate in my country. I want to develop in the direction of chemical engineering because it can play an important role in many areas.

Therefore, I think studying chemical engineering can give me knowledge to help people and society. I want to work at hospitals and companies.

BTW, I want your university because I like USA culture. My friend tells me your city has a lot of culture, music, movies, and good people. I think that is good for me. I like music and movies. So, I want to study at your university.
